

relief rainfall

What is the name of a place where information is collected about local weather?

twinkl.com

Campbell Stokes
Sunshine Recorder

What is the name for the layer of gases that surround a planet?

twinkl.com

condensation

What type of rainfall is formed when the ground heats up during warm, sunny weather?

twinkl.com

weather station

Which are the highest clouds in the atmosphere?

twinkl.com

rain gauge

What type of rainfall is formed by air rising over high ground?

twinkl.com

air pressure

What is the name of the process when water turns from a liquid to a gas (water vapour)?

twinkl.com

atmosphere

Which weather instrument is used to measure air pressure?

twinkl.com

wind vane

What is the process when water vapour turns into a liquid?

twinkl.com

cirrus clouds

Which weather instrument is used to measure the wind direction?

twinkl.com

evaporation

What type of air pressure does sinking air cause?

twinkl.com

precipitation

What describes how warm or cold the air is?

twinkl.com

barometer

What is the name for the force or weight of the air above us?

twinkl.com

convectonal rainfall

Which weather instrument is used to measure the number of hours of sunshine?

twinkl.com

temperature

Finish!

twinkl.com

Start

Which weather instrument is used to measure precipitation?

twinkl.com

high pressure

What is the name for any type of moisture reaching the earth's surface e.g. rain, snow, fog?

twinkl.com

Answers

Start	Which weather instrument is used to measure precipitation?	rain gauge	What type of rainfall is formed by air rising over high ground?	relief rainfall	What is the name of a place where information is collected about local weather?
condensation	What is the process when water vapour turns into a liquid?	wind vane	Which weather instrument is used to measure the wind direction?	cirrus clouds	weather station
What type of rainfall is formed when the ground heats up during warm, sunny weather?					Which are the highest clouds in the atmosphere?
convective rainfall	Which weather instrument is used to measure the number of hours of sunshine?	Campbell Stokes Sunshine Recorder	What is the name for the layer of gases that surround a planet?	atmosphere	Which weather instrument is used to measure air pressure?
high pressure	What type of air pressure does sinking air cause?	evaporation	What is the name of the process when water turns from a liquid to a gas (water vapour)?	air pressure	barometer
