

# Types of Rainfall

## 1. convectional rainfall

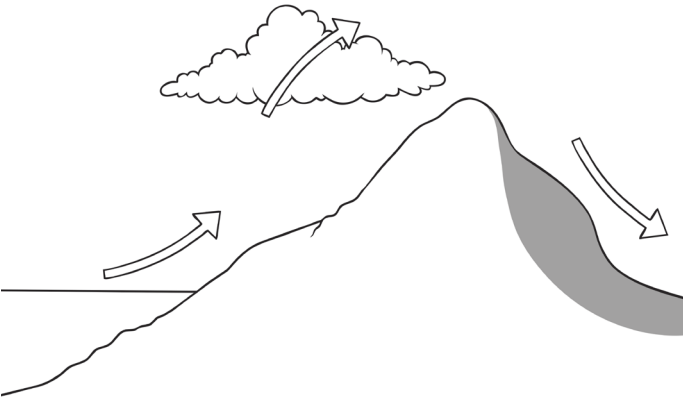

Convectional rainfall is...

How does it form?

Where does it usually form?

## 2. relief rainfall

Relief rainfall is...

How does it form?

Where does it usually form?

## 3. frontal rainfall

Frontal rainfall is...

How does it form?

1. When a warm air mass meets a \_\_\_\_\_ air mass, they do not mix as they have different densities.
2. The warm, less dense air is forced to \_\_\_\_\_ over the cold, dense air. This is called a **front**.
3. The warm air \_\_\_\_\_ and the water vapour condenses into clouds and \_\_\_\_\_.

Where does it usually form?
